STUDENT & FACULTY NEEDS

The top three ways all libraries are addressing student and faculty needs include:

- **CURBSIDE PICKUP**
  - Books, laptops, school materials

- **VIRTUAL REFERENCE**
  - Via email, phone, chat

- **NEW “HOW TO” RESOURCES**
  - For accessing virtual resources

---

"The mother of half a dozen children, ages 4–14, who were all out of school because of coronavirus told us, "YOU’RE A LIFESAVER!!" The kids were supposed to be reading 20 minutes a day, but after a week of lockdown were out of books. I helped the mom with our online library and reassured her she could call back any time."

- Brigham City Public Library (Utah)

---

"I am the administrator for our school’s Accelerated Reading program, and I was instrumental in facilitating its use for teachers when they expanded their online resources to home use, helping with communications, troubleshooting for teachers and students, etc."

- High Mount Elementary School (Illinois)

Libraries are Getting eRecords from Many Sources
Deciding which e-resource catalog records to send for authorities processing
e-Resource Collections in Library Catalogs

• The number of records can be massive
• The quality and completeness of records varies
• Titles within the collection, and sometimes the entire collections, are more subject to “coming and going”
Factors to Take Into Account

• What is the degree of certainty that the records will be kept in the catalog for a reasonable length of time?

• Does the number of records in a given collection fit within the budget for authorities processing?

• What is the level of cataloging for a collection (do the records contain enough access points to make the records worth matching against LC authority files)?
At Wellesley College ...

Records we send for authorities processing:

- “Permanently owned” collections like Eighteenth-Century Collections Online (ECCO)
- JSTOR Purchased and Open Access e-books
- MARCIVE GPO records
At Wellesley College ...

Records we *don’t* send for authorities processing:

- e-book and video streaming titles in collections where the number of monthly deletes is high—typically Demand-Driven Acquisitions (DDA) or Evidence-Based Acquisitions (EBA) collections
  - Ebook Central, JSTOR DDA and EBA e-books
  - Docuseek, Films on Demand, Kanopy
- Frequently overlaid records
  - Serials Solutions
Updates to Records After Authorities Processing: What to Watch For

• Frequently updated catalog records, may lose some of the benefits of authorities processing when the records are overlaid.
• Try to protect specific MARC fields or create a specific record loading profile to minimize this problem.
• Alternatively, you can allow the overlays and resubmit records for authorities processing.
Special Thanks
to the Facebook group Troublesome Catalogers and Magical Metadata Fairies who inspired some of the examples detailed in this presentation.
Types of Errors

• Table of Contents with a very long string placed in one field. Or: Chapter 1, Chapter 2, etc.
• Notes fields with run-on sentences, words together with no spacing, and strange symbols
• Album titles missing from the record (music)
• Vague subject headings such as “Business”
• Abbreviations in the Title like Jrnl instead of Journal
What Can MARCIVE Fix?
Artist names that were incorrectly split and inverted: Youth, Sonic should be Sonic Youth.

Multiple Names in the 100

• If the 100 has names separated by commas, MARCIVE cannot do anything programmatically.
• However, we do have a method of parsing out names by matching information in the tag to an authority record.
